

## iCAPS Complete Computer Solutions

### *Finite Capacity Workshop*

We have just released an exciting new feature to the iCAPS system and we'd love to show it to you.

Book now to secure your place on a **FREE** half day workshop **at the iCAPS offices on Friday the 26th of June at 9.30 am** to see how finite capacity can benefit the smooth-running of your production system.

Changes to the system.

ZM8401 - Work Centre Loading Generation.

"Available Procedures" option, now gives the ability to run either a Infinite or Finite loading run.

When the program is actioned from the menu, the default option is set to the existing Infinite loading.

To run a Finite load, change the option in the Available Procedures, there are no Options for this type of run, the form display a "Process Now" only button.

After the Process Now has been actioned, a "Warning" form is displayed with the text "You are about to recalculate the Start and Due Dates of all open Manufacturing Orders / Operations, Are you sure ?" The default option is "No". This prevents the Finite loading being run accidentally.
